Care After Installation

How to Protect Your Countertops & Cabinets from Day One

Congratulations on your new space! Proper care after installation is essential to protect your surfaces and keep them looking beautiful for years to come. Please review the guidelines below for best results.

First 24-48 Hours After Installation

- Avoid placing heavy items on newly installed surfaces
- Do not clean with chemicals or abrasive products
- Allow adhesives and sealants to fully cure
- Use surfaces gently during this period

This initial curing time helps ensure long-term durability and performance.

Daily Care - All Countertop Materials

A cartoon character with a head made of a marble countertop, wearing a black suit, white shirt, and orange tie. The character has a large mustache, a monocle, and is giving a thumbs-up. A name tag on the suit says "BLICK".

- ✓ Use mild dish soap and warm water
- ✓ Clean with a soft cloth or non-abrasive sponge
- ✓ Wipe spills promptly
- ✓ Use cutting boards and trivets

A cartoon character with a head made of a marble countertop, wearing a black suit, white shirt, and orange tie. The character has a large mustache, a monocle, and is pointing. A name tag on the suit says "BLICK".

- ✗ Do not use abrasive pads or powders
- ✗ Avoid bleach, vinegar, ammonia, or harsh cleaners
- ✗ Do not place hot pots or pans directly on surfaces

Natural Stone Countertops

(Granite, Marble, Dolomite, Quartzite)

- Clean with a pH-neutral stone cleaner or mild soap
- Seal periodically, as recommended for your material
- Wipe spills immediately, especially acidic substances

Avoid:

- Citrus-based cleaners
- Vinegar or lemon juice
- Scrubbing pads

Natural stone is durable, but it is porous and benefits from gentle care.

Quartz Countertops

(Engineered Stone)

- Quartz does not require sealing
- Clean with mild soap and water
- Use trivets to protect from heat

Avoid:

- Harsh chemicals or oven cleaners
 - Prolonged exposure to high heat
